Professional Summary

Full-Stack Software Engineer with 12+ years of experience building scalable web applications, SaaS platforms. Strong background in JavaScript (Vue.js, Node.js), MySQL, PostgreSQL and exposure to React and Python with a focus on performance optimization, cross-browser compatibility, and accessibility. Experienced in leading complex technical projects, mentoring peers, and collaborating with cross-functional teams to deliver impactful user experiences. Recently I am focused on Rust.

Professional Experience

Gameflex </software> – Senior Full Stack Developer

March 2021 - Present

- Led the development of a cloud-based task management platform integrating HR management, project automation, rapid game development and its **Build/DevOps pipeline**, and OKR tracking, using **Node.js** with **Fastify** framework for backend services and managing complex **microservices architecture**.
- Designed and developed components in **Vue.js**, implemented API hooks and **Realtime DB integrations**, enabling efficient data flow and low-latency updates across the platform.
- Built and maintained CI/CD pipelines with GitHub Actions, reducing deployment time and technical debt.
- Provided technical mentorship to a team of **6 members** (5 junior-to-mid developers and 1 junior system analyst), setting best practices for code quality, maintainability, and collaborative development.

Glitch Studios – Full Stack Developer

November 2020 - March 2021

- Delivered web development projects for enterprise clients (Delta & Eltek), focusing on messaging and newsletter systems.
- Integrated AR features into a web XR project using modern browser APIs for improved user engagement.
- Collaborated with designers and product managers to ship client-facing features on schedule.

Havas CX – Full Stack Developer

March 2019 - October 2020

- Built and delivered multiple digital campaigns for global brands, adapting quickly to diverse tech stacks and client requirements.
- **Jack Honey IE Campaign (2019):** Developed an Angular-based app without prior framework experience, deployed on Heroku with WordPress integration for usage statistics by venue. Implemented SMS-based code entry system to enable in-bar promotions.
- **Yarının Suyu (Tomorrow's Water):** Created a single-page application (SPA) raising awareness on water conservation. Implemented interactive 3D elements using Babylon.js, vector graphics, and advanced CSS/Canvas manipulations for engaging visual storytelling.
- Collaborated closely with designers, product managers, and global client teams to deliver responsive, accessible, and cross-browser compatible applications.

Akcura Kaucuk – IT Technician

April 2006 - December 2006

- Managed company and client **IT infrastructure**, including network connectivity, **Active Directory**, **Windows Server**, file sharing, **DNS**, and **DHCP**, ensuring seamless operations and optimized system performance.
- Served as **webmaster** via an agency, maintaining and enhancing the company's website to strengthen online presence.

Education

- **Istanbul University** - Bachelors in Classical Philology (Dropped-out) 2009 - 2012
- **Anadolu University** - BSc in Management Information System 2021 - 2025
- **Royal Holloway, University of London** - MSc in Cyber Security (Distance Learning) 2025 - 2028

Skills

Hard Skills: JavaScript, Vue.js, Node.js, PostgreSQL, Full Stack Development, Cloud-Native Applications, SCRUM, Python, React, Rust, C++, Go, Figma, shell/bash, Nginx, Google Cloud Platform, AWS.

Soft Skills: Solution-Focused, Inner-Source Management, Fast Learner, Future-Proof Thinking, Continuous Learning, Project Management, Analytical Thinking.

Projects

Guinevere - *Web-based Video Editing Software (Decommissioned)*

Tech Stack: Canvas API, Konva.js, Vue.js, HTML5, CSS3

- Developed a **web-based video editing platform** using the **Canvas API** and **Konva.js**, enabling users to create and edit videos directly in their browser.
- Implemented drag-and-drop functionality for adding media, customizing frames, and manipulating video content.
- Focused on **user experience**, optimizing the application for smooth rendering and ease of use for non-technical users.
- **Project now decommissioned** due to evolving technological needs and shifting project priorities.

Dragoon Tunnel - *Cross-platform Tauri/Rust Application*

Tech Stack: Tauri, Rust, Vue.js, GitHub Actions, shell/bash, Network Protocols, GoLang

- **Problem:** Developed a standalone application to circumvent the Discord ban in Turkey, ensuring the company's communication and development workflows remained uninterrupted.
- **Solution:** Built a reverse proxy application using **Rust** for both Windows and macOS, enabling the Discord PWA to function through a single, secure cloud server, resulting in significant cost savings.
- **Skills Demonstrated:** Self-directed learning (learning Rust from scratch), problem-solving, and end-to-end project ownership.

Certifications

Meta React – Sept 2025 | React, Hooks, Context API, Advanced Patterns

Google UX Design – Sept 2025 | WCAG, Figma, UX Research, Lo-Fi/Hi-Fi Prototyping, Dynamic UIs

IBM Full Stack Software Developer – Nov 2024 | Python, Django, Flask, Node.js, React, Microservices, NoSQL, SaaS, Cloud, DevOps

IBM Data Science Specialization – Nov 2024 | Data Science, Analysis, Web Scraping, Visualization, ML, Generative AI

Google Project Management – Dec 2024 | Project Management, Agile, RACI Matrix
